

# STEMFEST 2024 PRE-VISIT ACTIVITIES

To get your students excited for STEMfest 2024, why not try the classroom-friendly activity suggestions below:

- Make a fact-file about Charles Darwin and his voyage between 1831-1836. Questions to research can include:
  - Who was Charles Darwin?
  - What was the name of the boat Darwin sailed on?
  - Which countries did Darwin visit on the voyage?
  - What theory did Darwin publish, and did everyone agree with it?
- Watch episodes of the World's Most Exciting Classroom on YouTube and find out about the Darwin200 Project.
- Choose your favourite animal (terrestrial or marine) and research how its key features make it well suited (adapted) to its habitat.
- Research the Plymouth Sound National Marine Park (PSNMP), the UK's first National Marine Park! Use your research to produce a poster, encouraging people to visit the PSNMP.
